Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant discussed the subject matter of claim 1. He further pointed out that the prior art of record, Nakajima, failed to teach the limitation "a provider of the protected area requesting the authentication unit to determine the unique connection identifier of the second network using the unique identifier of the first network when the terminal would like access to the protected area". Examiner respectfully disagreed with Applicant's arguments. No agreement was reached at this time for allowance.
